## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 31, 35, 36, and 38-65 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. For example, independent claims 31, 46 and 54, recited "selecting a pixel value based on a number of occurrences of the pixel value in two idle graphics frames and representing the pixel value in an idle graphics frame with a code to compress the idle graphics frame". The only area briefly suggests the claimed feature is in the abstract. However, the abstract fails to provide enough details in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The other areas of specification, such as, paragraphs 14, 26, 27 and 32 fails to provide the missing details of the claimed subject matter as required under 35 USC 112, 1<sup>st</sup> paragraph.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 31, 35, 36 and 38-65 have been considered but are moot in view of the new ground(s) of rejection.
